

”

“With **ZF EcoLife** we already enable hundreds of bus operators around the globe to perform more efficiently. With our **ZF Health Check** offering, leveraging remote vehicle data access and predictive analytics, we can now accompany our fleet customers even one step further towards zero downtime and paving the way for a sustainable aftermarket.”

Philippe Colpron

Head of ZF Aftermarket and
Executive Vice President, ZF Group

ZF health Check ensures continuous remote readout of ZF system's data providing:

- Condition monitoring and predictive maintenance
- Alerting on ZF system's health status
- Remote service
